

Hello,

We use report to print address on a sticker. One sheet include 10 stickers. It is possible to tell a generator that we print e.g. on a sheet where three stickers were used before and that it is necessary to print from 4th position?

1 - Used before	2 - Used before
3 - Used before	4 - Possible to print
5 - Possible to print	6 - Possible to print
7 - Possible to print	8 - Possible to print
9 - Possible to print	10 - Possible to print

Thank you
