

DPI Test Report

is a long text string to demonstrate truncation with DPI Setting of !

is is a long text string to demonstrate truncation with DPI Settings, without contain

This is the same long text string to demonstrate truncation with DPI Settings,
but with a longer text box.

This test report is meant to illustrate a problem with the report to printer rendering that occurs when the DPI setting are set to non standard values.

Change the monitor DPI settings to 90%

Generate and view this report, observe the header text box.

Save the report as a PDF and confirm the header text box.

Print the report to a printer and observe that the header text has been truncated.

It seems to be problem with the rendering to the print driver.
